
The Role And Place Of "Jihadi" Management In Providing The Possibilities And Infrastructure Services In Pastoralism Regions

By: Mirwali Safarzadeh (Vice President of Iran's Pastoralism Community Organization)

Abstract:

After the victory of Islamic revolution, the ruling and usage of "Jihadi" management and culture which derived from religious teachings, was one of the expectations of Iran's revolutionary people. With the consideration of this great expectation, Imam Khomeini (PUH) issued the command for founding of "Jihad-e-Sazandegi" in June, 1979.

In this article and with the usage of existed data source in Pastoralism's Affair Organization and analysis of such datae, the specifications of "Jihadi" management and its remarkable and positive effects on doing works with people's participation has been described. Moreover, the most important problems of pastoralism community and their solutions has been noted.

Pastoralism community as a productive community and as the inheritor of country's past sociocultural situation, deprived from the minimum of facilities and services. The community's dispersion and its deprivation and impracticable of pastoralism region makes doing work for them hard and difficult. However, doing works with divine motives that exist in Jihad for God, makes every difficulty easy.

Before the Islamic revolution there was no any considerable attentions to pastoralism community, so at the bigining of victory of the revolution the pastoralism community was in absolute deprivation. Based on surveys done in this regard, among the human, welfare and development indices except of literacy index which had been 12% for 6 years old's population, the rest of other indices were between 0-10%. After the Islamic revolution and with the inspiration of Islamic culture, State's justice-oriented and deprivation-removing policies which has executed by jihadi management many efforts has been executed for this community. By approving of Act for Organizing of Pastoralism Community during the execution of 4th Country's Plan, such services run faster. Therefore the indices of pastoralism community's development grew up and the mean of indices from 26 at the end of 3rd Country's Plan grew to 46 at the end of 4th Country's Plan. Although many works has been done for

this community, however the pasturalism community is a deprived community already and needs to pay a special attention.
